March 15, 2023

Dear Hiring Manager,

I am excited to apply for the Data Analyst position at your company, as I am confident that my skill set, and experience align well with the job description.

As a detail-oriented and analytical individual, I have always been drawn to the field of data analytics. With my experience in data cleaning, analyses, building predictive models, and visualizations, I am confident that I can collaborate effectively with Data Scientists to help deliver data-driven solutions that meet business needs.

I am also skilled in providing background research, identifying data sources, and creating scope documents for new or ongoing projects. With my ability to help design, develop, and implement tools that empower data-driven decision-making, I am confident that I can contribute to the success of your group efforts.

In my current role, as a graduate research assistant for the last five years, I am proficient in advanced causal inference, observational data analysis, and applied econometrics tools such as difference-in-differences, instrumental variables, and regression discontinuity designs.

I am excited to bring my skills and experience to your team and contribute to your group's success. Thank you for considering my application. I look forward to discussing how I can contribute to your organization.

Sincerely,

Vikas PD Gawai
Ph.D. Student, Agriculture and Applied Economics Dept., University of Wisconsin-Madison, USA.
